

FidMe available on Windows 8

FidMe is compatible with every device, and more everyday! In January, we released FidMe on Windows Phone 8, in March for Bada 2.0, in April on BlackBerry 10 and Amazon Kindle Fire. Today, our developers team just launched a new FidMe application: Windows 8.

Available on tablets and computers with the latest Microsoft operating system, this application includes the main features of the user account available on line:

- More than 4000 loyalty programs in 100 countries;
- Discover stamps cards for tens of thousands of small businesses;
- Connect, manage, edit and optimize your FidMe account;
- Consult your FidMe points and actions history;
- Synchronize your cards, coupons, offers, directly to your mobile;
- Display of your news and top deals;
- Facebook and Twitter interaction...

Available on the Windows Store for Windows 8 devices, this first version will be soon completed with new features.

By then, you can login your user account from www.fidme.com, to change your personal information, manage your cards, review cards and programs, sponsor friends, etc.

About FidMe

FidMe, developed by Snapp' (Bordeaux), is the European leader application for dematerialized loyalty programs. Free and with no ads, FidMe is compatible with all mobiles. FidMe allows registering all the traditional loyalty cards and stamp cards of local shops. Thousands of local shops and franchise networks (Mezzo di Pasta, Mc Donald's, Quick, Columbus Café, etc.) have joined the service. FidMe has over 2 million users, 4.000 loyalty cards, 10 million dematerialized cards, 10.000 retailers. The application has received seven awards in 2011 and four in 2012. <http://www.fidme.com>
